

# CaseWorks™

Case Management & Assessment Software

## CaseWorks Software

CaseWorks™ software platform integrates our risk/needs assessment tools with a comprehensive case management system. CaseWorks™:

- contains modules for administering each of our assessment products
- can be customized to allow scoring of other assessment or screening tools
- puts tuning and configuration in the hands of the user
- integrates seamlessly with existing case management tools or other enterprise software platforms
- lets you track all client contacts, program involvement and scheduling, directly tying them to problem areas determined by assessment results
- enables you to tailor a solution to your specific needs.

Orbis has worked with many clients to integrate its systems into their existing infrastructure. We've done simple integration projects with smaller clients as well as complex statewide integration projects. Currently, our software is in use in over 200 agencies and departments, at various levels of government, and in many private and non-profit organizations.

When you focus your case work around the case plan and the assessment results, you can concentrate on building change in your client.

If you would like an online demonstration of our assessment tools and software products, or would like more information, please contact [software@orbispartners.com](mailto:software@orbispartners.com).
